

# SECURITY ASSESSMENT IN TELEWORKING MODE

In a common physical environment, you need to focus on the governance of your business, assess your risk appetite and deploy the tools, services and components related to the dimensions most at risk. In teleworking mode, you have less or no longer control over the physical environment and/or the equipment used by your employees. How can you ensure that you are not putting your operations at risk?

NOVIPRO offers you an assessment in 70 control points to evaluate your risks. The objective of this assessment is to ensure the continuity of your team's activities without putting your business operations at risk. An exchange with an expert will allow you to evaluate your level of risks related to teleworking.

## ESTIMATING THE DURATION OF ASSESSMENT:

A qualification and introduction phase must be carried out in order to guarantee the deliverables and the actual duration.

## WHAT THE ASSESSMENT INCLUDES:

- Our expert will analyse and comments your 70 control points answers
- Synthesis document
- Short, medium and long term areas for improvement

## PREREQUISITES FOR ASSESSMENT:

- Perimeters related to telework
- Availability of a person who can act as the representative (IT Manager)

Are you aware of the risks associated to telework?

## ASSESSMENT IN BRIEF

The assessment provides immediate value on the formalization of risks while prioritizing remediation actions on a given perimeter. The results of this assessment is evaluated on a scale of 1 to 5 (1 requiring urgent intervention and 5 representing a safe perimeter) and will allow you to focus your efforts on the dimensions most at risk.

## DIMENSIONS ANALYZED

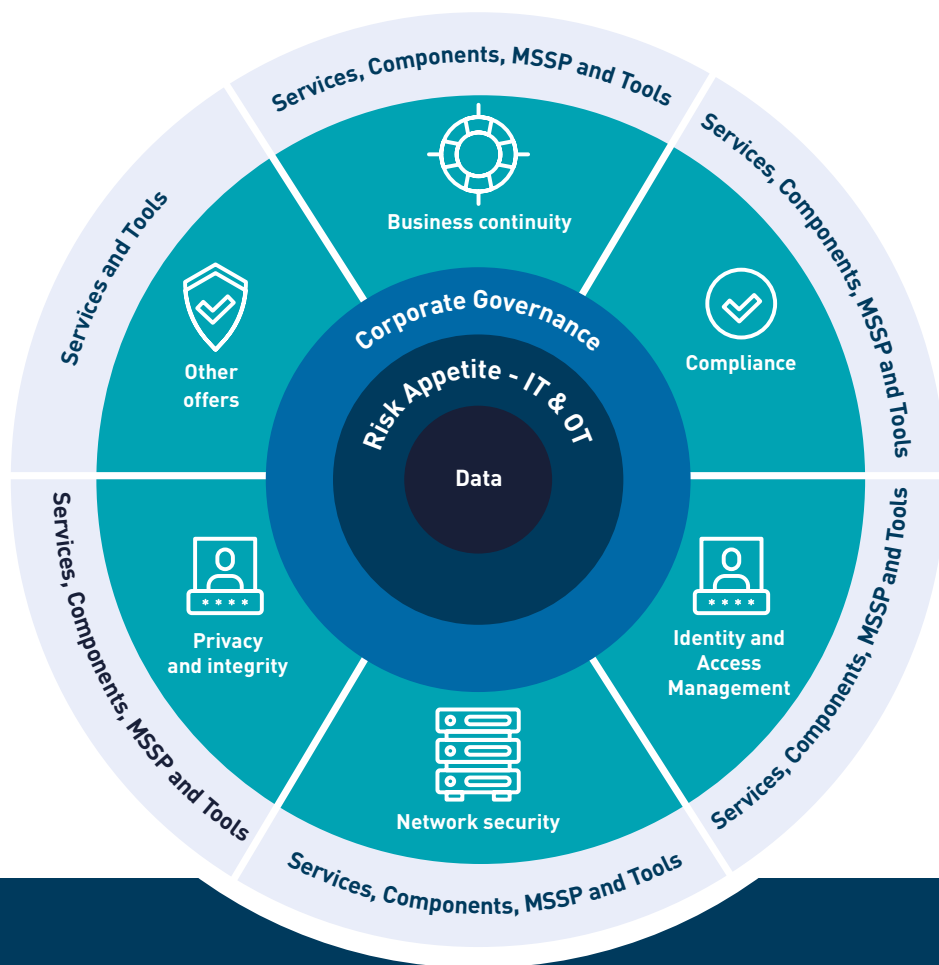

The assessment will allow you to visualize actions to be taken in the short, medium and long term:

- Urgent actions to be carried out alone or accompanied.
- Actions to be planned as soon as normal mode is restored.
- Actions to explore and validate the potential gain.

At any time, the NOVIPRO team can accompany you in the different steps towards the optimization of your company's security.

# THE ECOSYSTEM OF NOVIPRO'S SECURITY OFFERING

NOVIPRO puts the expertise of its security team at your service to ensure the protection of your business. From the management of policies and procedures to the development of a business continuity plan, NOVIPRO is able to meet all of your needs, including all aspects and components related to security.
