

THE VISIBILITY: A KEY PLAYER IN DETECTING ATTACKS AGAINST YOUR INFRASTRUCTURE

In today's cyber security environment, the number of computer attacks is constantly increasing and your data is continually at risk. To maintain its status as a trusted partner, NOVIPRO is committed to the security of your information and we are aware that security development plans cannot always be prioritized internally.

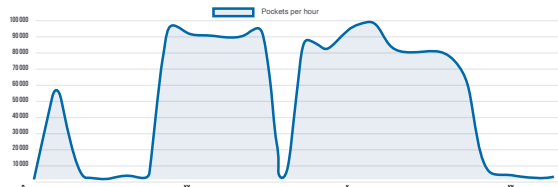

NOVIPRO's security visibility offering insures your peace of mind by providing you answers to critical questions:

- Am I being targeted by attackers?
- Am I a victim of stolen data?
- Do I have good visibility of my network?

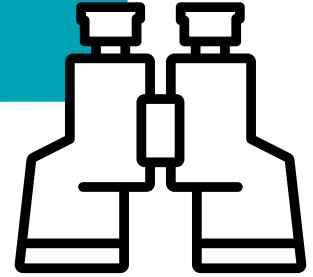

The objective of NOVIPRO's teams of experts is to support you in effectively adapting your security response in the event of an incident, to increase your visibility on your network and to minimize the impact on your operations.

cyberattack?

THREAT DETECTION IN BRIEF

Cybercriminals are doubling up ingenuity not to awaken the suspicions of the technical teams

- External scans
- Weak signals
- Lateral movements
- Data Extraction
- Activities Embedded in Operation Flows

It is not humanly possible to monitor all input sensors logs alerts and other events. NOVIPRO's visibility solution uses artificial intelligence to constantly adapt and analyze the thousands of events recorded on both external and internal flows in order to detect threats quickly.

VISIBILITY

Any anomalies detected are immediately transmitted to our cyber security experts to analyze them in relation to your structure. False positives will be eliminated and alerts will only be sent to the ones that need to be taken care of by your teams. You will therefore be in to make the appropriate corrections quickly on the elements of the following:

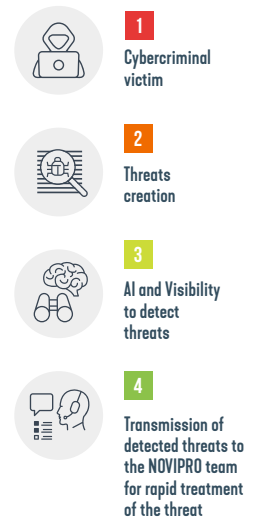

- Contextualized alerts for your experts
- Security actions triggered by our teams

SUPPORT

NOVIPRO rather than sending you the alerts requiring intervention, NOVIPRO will analyze them, determine the actions to be taken and will accompany you in the application of the corrective measures to be taken.

In addition, we can also provide you with a team of experts in security to support your teams in case of cyber attacks.

THREAT DETECTION PROCESS

THE ECOSYSTEM OF NOVIPRO'S SECURITY OFFERING

NOVIPRO puts the expertise of its security team at your service to ensure the protection of your business. From the management of policies and procedures to the development of a business continuity plan, NOVIPRO is able to meet all of your needs, including all aspects and components related to security.

HIGH-LEVEL EXPERTS

NOVIPRO's team of experts consists of CISOs, consultants, analysts and technical specialists. NOVIPRO complies with the recommendations of the Disaster Recovery Institute International (DRI), Forrester's Zero Trust (ZTX), ISO 27001 and Cobit methodologies that promote best practices for assessing and managing IT risks and ensuring business continuity.
